Questions and answers session followed afterwards. Below are the list of 11 questions and given answers:

Q1: The Period of implementation of tasks mentioned in the Article 15. of the Supply Contract Notice is considered as short. If some ordered articles from this list shall be imported, the customs clearance may delay the supply process. Is there a possibility to extend it?

A1: The time limits for delivery in Article 15. Period of implementation of tasks of the Supply Contract Notice and Article 1.1.3 of the Draft Contract were revised as follows:
- no later than 28 calendar days for items 1.1-9.6 (i.e. all the items included in the Technical Specifications)
- for items 10.1-10.3 delivery terms shall be specified in the Order Form and could vary from one hour to couple days.
- no later than 37 calendar days for the items which are not initially included in the Technical Specifications (e.g. as additionally ordered by the Contracting Authority as per Article 1.1.5 of the contract, or optionally offered by the tenderers (e.g. catalogue) after e-mail submission of the approved Order Form by Contracting Authority to the Contractor.”

Q2: Do the quantities of articles provided in the Hypothetical scenario of the Annex IV Budget Breakdown reflect quantities which EUAM intends to procure during 1 calendar year? Is there any pre-approved plan or schedule of one-off purchases?
A2: The quantities in the "Hypothetical Scenario" are estimated only and provide our expectations for procurement on 1-year basis. They will be used for financial evaluation purposes only and EUAM is not obliged to purchase them after this contract is signed.

The exact plan of purchases does not exist, due to the specific character of Mission activities, including Projects, so, needs in furniture and household equipment cannot be predicted or specified in advance.

Please, find attached updated Annex IV Budget Breakdown with the Hypothetical scenario in the Corrigendum 1 with revised quantities.

Q3: Please, clarify units in which the item 10.3 “Design services” is defined and shall be priced.

A3: The unit of measure for item 10.3 “Design services” is “1 specialist per 1 hour”.

Based on each specific request of the Contracting Authority, the company will have to advise their estimation in regards of the time for provision of furnishing plans in 2D and 3D and color pictures.

The Contract Manager of the Contracting Authority reserves the right to assess the reasonableness of time quoted by the Contractor. If the time proposed is acceptable to the Contracting Authority, the latter reserves the right to purchase the service via official Purchase Order.

Q4: Technical offer shall provide items in several options of colour finishes, though specific RALs are not defined. What if our palette of finishes is very wide and almost all colours are available for selection?

A4: You are right, Technical specifications are not too restrictive in purpose in order to give wider possibilities to Tenderers for offering.

Your technical offer shall clearly state available options (at the quoted price) responding to minimum technical requirements. Your products shall be proposed in at least those colours, which are included into the minimum selection.
